<b>Effect on Logistics Support, Interface or Software:</b>	NONE
--	------

Reference Documents: **SRD paragraph 3.1.2.1 b**

**Description of Deviation / Waiver:** SRD requirement 3.1.2.1b states "The DAS shall provide periodic, unsolicited summarized resource allocation status reports to each DAS customer." The current design provides a summarized allocation report to SWSI upon request to SWSI for each customer.

Request a deviation to this SRD requirement such that summarized resource allocation reports to SWSI are provided upon request instead of as unsolicited reports.

Need for Deviation / Waiver: Compliance with DAS-SWSI ICD.

**Corrective action taken:** None. The current design is consistent with the requested change and improves the system's usability by reducing the number of reports not specifically requested by the user. Approval of this change will require no software programming changes and imposes no system impacts. Denial of this change will require both DAS and SWSI programming changes, DAS-SWSI ICD changes and DAS-SWSI XML interchange changes.
